

- “JoshuaPeng_testscore_zip11.sas7bdat” and “JoshuaPeng_testscore_zip12.sas7bdat” are extra bonus data that I would like to have scored. I describe these models in detail in the Bonus section.
- **Joshua Peng Deploy Model.sas:** deploys only my best model (model 6: zip)
- **Joshua Peng Deploy Model Merged.sas:** deploys all 5 models (model 2: poi, model 4: nb, model 6: zip, model 8: zinb, model 10: reg) and merges them together in “JoshuaPeng_testscore.sas7bdat”
- **Joshua Peng Deploy Model Bonus.sas:** deploys all 5 models and compares PROC PLM vs. SAS data step for ZIP/ZINB models for bonus points
